

Product Installation Instructions

Shower Timer

To complete installation you will need:

- shower timer (located in your kit)

Instructions

1. Locate and remove the shower timer from your kit.
2. Wet the back of the suction cup with a small amount of water.
3. Apply the suction cup to the shower wall in a place where you can easily read the timer.
3. At the beginning of each shower, rotate the timer to start the clock. When the sand has traveled from one cavity of the hourglass to the other, you know the five minutes has passed and you should complete your shower.
